GOAL: The UW Office of Sustainability aimed to (and continues to aim to) shift toward ZERO WASTE within our office through conscious changes in habit and practice.

ACCOMPLISHMENTS:
- Lowest amount of waste in last recorded week of 8 week long office waste audit: <1 pound of combined trash and recycling (mixed paper, office paper and comingle).
- Increased awareness of personal contributions to the office and overall waste systems.

LESSONS LEARNED:
No matter how small each individual’s contribution of waste may be, any amount of waste has an impact.
