

Office of Sustainability
UNIVERSITY OF WISCONSIN-MADISON

The [Office of Sustainability](#) seeks a graduate student Project Assistant to lead dashboard and report development for sustainability-related data on the UW–Madison campus. Appointment level will be 40 - 50% (negotiable), with tuition remission and stipend included.

The candidate will work closely with the Senior Analyst for the Office of Sustainability ([Alex Frank](#)) to organize, analyze, and visualize data associated with the [STARS](#) report. While specific tasks will be determined collaboratively between the candidate and Mr. Frank, projects could include expansion of [web-based data dashboards](#), creating interactive data visualizations, developing automated sustainability assessment reports, or translating STARS report data into a [Times Higher Education Impact Rankings](#), [Global Reporting Initiative](#), or similar report.

An ideal candidate would enjoy both working in small groups to develop an approach to solving a problem and working independently to implement the solution. Candidates will be asked to communicate the results of their analysis and engage (e.g., email, presentations, video conference) with campus partners to identify efficient mechanisms to share and visualize data and analysis results. Additional preference will be given to individuals with experience automating processes and/or developing interactive data visualizations (whether professional or classroom-based experience).

Applicants should submit a CV and cover letter describing their interest in the position and relevant background to Alex Frank at alex.frank@wisc.edu. Deadline is June 30, 2023.
